GREGORY'S VEGETABLE SEEDS

ESTABLISHED 1856

1940 Special Prices for Market Gardeners

10% cash discount on cash orders sent in before February 20, 1940 We pay postage or freight, our option.

GREGORY'S GUARANTEE

1. That all seeds shall reach our customers in good condition.

2. We guarantee the vitality and purity of our seeds to the full amount of the purchase price. Your money back within one year if you are not satisfied with results.

3. It is agreed that in no case shall J. J. H. Gregory & Son be liable for more than purchase price of the seed.

We make no charge for cloth bags.

Our eighty-fourth anniversary. Gregory's seeds have been planted in all sections of the world.

The Hubbard Squash, one of our earliest introductions, is still going strong and is listed by all leading seedsmen of the country.

The Delicious, another introduction, was sent out many years later and is noted for its fine grain and superior quality.

Another of our introductions is the Symmes Blue Hubbard. This is now the leading variety grown by gardeners throughout the New England States.

It is estimated there were 20,000 tons of squash produced in Massachusetts this year. One farmer in New Hampshire grew something like 700 tons. A farmer in Massachusetts planted 50 acres. The writer had the pleasure of calling upon both parties and can say he never saw a handsomer sight and never before saw so many squash in one pile.

In Maine, at an experimental farm, about 30 samples of Tomatoes were planted, comprising twelve plants each. Early yields up to August 17, the Gregory Tomato outyielded all others, being first in rank on the entire list. Yield was 13 lbs., 14 oz. The next nearest was 12 lbs., 3 oz.

We are justly proud of these introductions. There are many excellent varieties in this list that are worthy of your consideration. We call your attention to the following strains:

Crosby Egyptian Beet; Hutchinson Carrot; Commodore Bean, 10-Inch, New Kidney Wax, Sure Crop or Bountiful Wax, and Rust-Proof Horticultural Shell; Copenhagen Market Cabbage and Hollander Short-Stem Danish; Snowball Cauliflower; Golden Plume Celery; Extra Early Golden Market Corn, and Whipple's Giant Golden; White Big Boston Lettuce; Abbott's Improved Hollow Crowned Parsnip; Laxton's Progress Pea, Early Morn, Gregory's Excelsior and Wyoming Wonder; Gregory Tomato, Rutgers and New Cardinal.

We have made our prices very reasonable for high quality stocks and trust we may have a share of your patronage. These prices will be maintained as long as stocks last, but are subject to change without notice.

Yours for a prosperous season,

J. J. H. GREGORY & SON, Edgar Gregory, *Prop.*

GREGORY'S SPECIAL PRICES FOR MARKET GARDENERS

LAWN SEED (Highest Quality)

For Sunny Spots, 1b. \$0.45; 5 lbs. \$1.75; 10 lbs. \$3.25; 20 lbs. \$6.00 For Shady Spots, 1b. .50; 5 lbs. 2.00; 10 lbs. 3.75; 20 lbs. 7.00

It's a good idea to scatter lawn seed over your lawn each spring. Usually there are bare spots that can be renewed by this method. Lawns need plant food, and we suggest the following fertilizers:

FERTILIZERS

Nitrate of Soda, excellent to use on Kentucky Blue Grass and clover lawns, 5 lbs. per 1000 sq. ft. in early spring; in summer 2 lbs. per 1000 sq. ft. Always follow by heavy wetting.

Cotton Seed Meal, rich in nitrogen, may be used on a lawn before grass starts or as top dressing after first cutting; break all lumps, and give lawn a thorough wetting.

TIMOTHY

Lb. \$0.25; 15 lbs. \$2.25; 45 lbs. \$8.00

RED TOP

Lb. \$0.30; 5 lbs. \$1.25; 10 lbs. \$2.50

KENTUCKY BLUE GRASS

Lb. \$0.40; 5 lbs. \$1.80

FERTILIZERS (Continued)

Sulphate of Ammonia discourages the growth of troublesome weeds; 4 lbs. to 1000 sq. ft. spread on just before a heavy rain in spring. For summer use, 2 lbs. per 1000 sq. ft. is advised, and don't neglect giving the lawn a thorough wetting afterwards.

5-8-7

For a general fertilizer, one analyzing 5% nitrogen, 8% phosphoric acid, and 7% potash, we can recommend from our own experience. In making a new lawn, use 10 lbs. per $1000 \, \text{sq.}$ ft. and work into the soil just before leveling for the seed bed. You may also use just before grass starts in the spring, 4 lbs. per $1000 \, \text{sq.}$ ft., thoroughly wetting afterwards.

SUGGESTIONS

RED ARROW SPRAY

The most effective against the Mexican Bean Beetle. Price: 1-oz. bottle, 35c. (makes 3 gals. of spray), 4-oz. \$1.00, $\frac{1}{2}$ pt. \$1.75, pt. \$3.25, qt. \$6.00. Express not paid.

BLIGHTS AND MILDEWS

Spray with Bordeaux Mixture, starting early in the season and tenday intervals and after rains.

CABBAGE MAGGOTS

One ounce of Corrosive Sublimate to ten gals. of water. Put $\frac{1}{2}$ cupful around each plant at intervals, starting in May.

SQUASH BORER

Spray the root stalks with Red Arrow, especially close to the ground.

CORN BORER

Spray the leaves, especially the central whorl of the main stalk, every few days to destroy eggs or young larvae, starting when stalks are young, using Red Arrow or some good spray.

NEW INTRODUCTIONS

Commodore Bean, described as a dwarf Kentucky Wonder, since the pods are similar to that well-known pole variety. Round green pod 7 inches long; stringless at all stages of growth; of excellent quality.

10-Inch Bean. A forcing variety; a very heavy cropper. Long, narrow green pod thrives well when grown outside the same as any other bush bean. Pods flat, straight, 10 to 12 inches long. In young state, quality and flavor excellent. Stringless when picked young.

Sure Crop or Bountiful Wax. Improvement on the old-style Sure Crop; a much heavier cropper. Stringless.

Rutger's Tomato is coming to be one of the foremost varieties, blight resistant. Vigorous plants, fruits average $6\frac{1}{2}$ to $7\frac{1}{2}$ ounces; solid, and a good cropper.

If per express, please name company and office in spaces below; it per Railroad, name Station.

JAMES J. H. GREGORY & SONS, Vegetable and Flower Seed,

MARBLEHEAD, MASS.

CAREFULLY READ THESE INSTRUCTIONS.

Our customers in writing will please be careful and fill out their addresses in full, and keep their orders distinct from other matter. If you send mail prices (see full price-list in catalogue herewith) your seeds will be forwarded per mail postpaid; if you send express prices, seeds will be forwarded per express or railroad, as you may direct, at your expense for charges. In the case of large orders, if not specially instructed, we will use our own judgment in the interest of our customers whether to send them by express or freight.
